Hi Phil,

I am working with Nelson on this given his history with the cumulative. We hope to have something ready to share by Thursday afternoon.

Amy

Hi Amy,

I understand you're going to be providing some characterization of the impact on DW exposure due to aldicarb use on citrus in the context of the cumulative risk assessment for the OPs. I'm working on the dietary exposure portion. HED is aiming for a one-pager to describe the dietary portion. Let me know your thoughts on sharing our findings/thoughts as Don suggests below.

Thanks,  
Phil

It looks like EFED is ready to go on this now!

Phil – Do you want to reach out to Amy and start whipping up the CRA 1-pager?

**Subject:** aldicarb NMC

Hi,

We were able to discuss again within EFED what the inclusion of this new action for aldicarb would mean for the DWA in the NMC cumulative. We are comfortable/okay with the new action in terms of the DWA in the cumulative and are planning on writing this up (a paragraph or so). We are targeting having a draft to share by Thursday afternoon to have in time for the Alex briefing on Friday.

Let me know if you have any questions.

Amy
